# Bipin Joshi

Senior Software Engineer & Team Lead  
Kathmandu, Bāgmatī, Nepal

## Summary

As a Software Engineer and Team Lead, I bring a lot of experience in managing and executing multi-faceted web development projects across various domains. My journey through multiple companies with different roles and responsibilities has honed my expertise in backend technologies, full-stack development, and team leadership. I am adept in PHP frameworks like Laravel and CodeIgniter.

I am passionate about simplifying complex challenges, optimizing processes, and fostering a collaborative environment to drive project success. My approach combines technical proficiency with strategic project management, ensuring that every solution is not only technically sound but also aligns with business objectives.

---

## Experience

Veda App (वेद)  
Development Team Lead  
July 2022 - Present (1 year 9 months)  
Kathmandu, Bāgmatī, Nepal

At Veda, a key product of Ingrails Pvt Ltd, I began my journey as a Senior Software Engineer and subsequently ascended to the role of Team Lead in the Web Development Department. In this leadership capacity, I was responsible for overseeing the entire software development life cycle of Veda's suite of products, ensuring project completion within set timelines and to the highest standards and was also responsible for critical server management tasks.. My role encompassed not only technical development but also comprehensive team management, project coordination, and strategic planning in alignment with the overarching goals of Ingrails Pvt Ltd.

My key responsibilities here were:

1. Software Development Lifecycle Oversight: Managed and oversaw the entire software development process, ensuring projects were completed on time and met all quality standards.

2. Team Leadership and Development: Led a team of developers, focusing on training, motivation, and effective work practices. Provided regular guidance, feedback, and mentoring to foster skill development and goal achievement.

3. Project Management: Managed the overall planning, coordination, and execution of software development projects, ensuring efficient and effective use of resources using project management tools like jira and trello.

4. Technical Expertise: Maintained an active role in the development process, contributing to coding, problem-solving, and innovation.

5. Collaboration and Communication: Worked closely with other departments and stakeholders to align project objectives and ensure seamless integration of new software solutions.

6. Server and Hosting Management: Managed server-related basic tasks, including setting up new hosting environments for various school websites and Veda products.

Engaged on other products of veda like billing, finance, attendance, inventory, payroll, cms and school websites

Next Nepal Pvt .Ltd

Senior Laravel Developer

November 2021 - July 2022 (9 months)

Kathmandu, Bāgmatī, Nepal

At Next Nepal (2021-2022), I advanced from a mid-level to a Senior Backend Developer, focusing on Laravel-based projects. My role encompassed not only hands-on development but also team leadership, client management, and project handling. I mentored interns and junior developers, fostering a learning environment while managing complex web development projects. My expertise in web hosting control panels and backend technologies was pivotal in delivering high-quality web solutions.

My key responsibilities here were:

1. Laravel Framework Development: Specialized in using Laravel for robust backend development, ensuring high performance and scalability of web applications.

2. Web Development and Leadership: Led website and web app development projects, overseeing the full development lifecycle from concept to deployment.

3. Mentorship and Team Management: Guided and mentored a team of interns and junior developers, enhancing their skills and contributing to their professional growth.

4. Client and Project Management: Acted as the primary point of contact for clients, managing expectations and ensuring project objectives were met.

5. Web Hosting and Server Management: Handled multiple web hosting control panels including cPanel, CyberPanel, Digital Ocean, and Plesk, ensuring optimal performance and security.

Notable Website and CMS Projects:

1. GoGO / JustNep Food Delivery System
2. UrbarBazaar Website
3. CheeseWorld Ecommerce
4. SewaExpress Ecommerce
5. Durbarmart Ecommerce
6. Urbar Billing system

Other Projects:

Contributed to various projects including Sharmaz Acoustics, Chicco, Niuto Mart, Upachar Pharmacy, Clothings Nepal, Tibet Collectives, and Nehums NGO.

**Codecater**

**Web Developer**

December 2019 - July 2021 (1 year 8 months)

Kathmandu, Bāgmatī, Nepal

As a Web Developer at Code Cater Creative, I specialized in backend development using the Yii2 PHP framework. My role was pivotal in developing robust web applications and websites, employing the MVC pattern for efficient and scalable solutions. I also played a key role in mentoring interns and junior developers, fostering a collaborative and learning-focused team environment.

My key responsibilities here were:

1. **Yii2 PHP Framework Development:** Utilized Yii2 as the primary framework for backend development, ensuring high-performance and secure web applications.
2. **Web and Web App Development:** Engaged in comprehensive website and web application development, adhering to the MVC architectural pattern for efficient, modular, and maintainable code.
3. **Team Leadership and Mentorship:** Mentored interns and junior developers, providing guidance and assigning tasks to enhance team skills and project outcomes.
4. **Project Management:** Led project planning and execution, ensuring tasks were conducted efficiently and in alignment with project goals.
5. **Backend Development:** Focused on server-side development, database management, and application logic, ensuring robust and efficient backend functionalities.

#### Notable Website and CMS Projects:

1. **Poormans Online Directory:** Developed a comprehensive online directory, focusing on backend efficiency and user-friendly navigation.
2. **Advanced Online Records:** Created a sophisticated record-keeping system with advanced search and data management features.
3. **Attendance System (In-House Project):** Developed an internal attendance management system, enhancing employee tracking and data accuracy.
4. **Agent Nepal:** Built a dynamic web platform tailored for real estate listings, featuring advanced property search and agent profiles.
5. **Smartbus System**
6. **Travel Website:** Developed a travel and booking website, integrating various APIs for a seamless user experience.

#### Hello World Corp.

##### Junior Software Developer

August 2018 - September 2019 (1 year 2 months)

Kathmandu, Bāgmatī, Nepal

Started working as a backend Intern specializing in core PHP for 3 months and gradually promoted to junior software developer. As a Junior Software Developer at Hello World Corp, I embarked on my tech journey with enthusiasm and a commitment to excellence. Specializing in Core PHP,

HTML, CSS, JavaScript, and Bootstrap, I have honed my skills in web development and user interface design. My role involved creating robust, user-friendly websites and content management systems, ensuring both functionality and aesthetic appeal.

My key responsibilities here were:

1. Web Development: Leveraged Raw PHP and SQL to build dynamic, data-driven websites. Focused on writing clean, optimized code to create efficient and scalable web applications.

2. Content Management Systems: Designed and developed intuitive content management systems, enabling clients to easily manage and update their website content. Emphasized user experience in CMS design.

3. Frontend Development: Utilized HTML, CSS, JavaScript, and Bootstrap to create responsive and visually appealing website interfaces. Ensured cross-browser compatibility and adherence to web standards.

4. Project Management: Successfully managed multiple web development projects from conception to deployment, ensuring timely delivery and client satisfaction.

Notable Website and CMS Projects:

1. TVS Motors Nepal: Developed an interactive and responsive website, enhancing user engagement and online presence.
2. National College Website
3. Mandara Spa and Wellness Centre: Designed a serene and inviting online presence, reflecting the brand's ethos and attracting new clients.
4. Jagadamba Plastics: Built a product-centric website with a focus on showcasing the company's range and quality.
5. Hotel Parkland: Developed an elegant website with a booking system, improving the customer reservation experience.
6. Hotel White Lotus
7. Bishal Cements
8. PRK Business
